THE HUNT

NECROMUNDA '26 SOLO SCENARIO / AMBULL VARIANT

In the darkness of the underhive, the hunters become the hunted...

SCENARIO INTENT: This version preserves the search-and-ambush structure of the original solo scenario while replacing the legacy autonomous-enemy table with a Joint Ops-inspired Brawler behaviour priority. The foe is an Ambull rather than a rogue Ambot, and its profile translates the supplied Nemesis datacard into Necromunda-scale characteristics.

SCENARIO SETUP

BATTLEFIELD
Use the standard Necromunda '26 battlefield set-up guidelines. A 24" square battlefield works well; larger boards are possible. Pack the battlefield densely with walls, ruins, ducts, gantries and other features that create blocked sight lines and short approaches.

CREW
Choose a gang as normal for Skirmish play. Use Custom Selection (D3+4) to determine the crew.

DEPLOYMENT
Deploy the entire crew within 3" of the centre of the battlefield.

GANG TACTICS
Choose one Gang Tactic available to the gang, or randomly select two from those available.

PRIORITY
The player has Priority in every round. The Ambull never takes a normal alternating activation; it activates only when a scenario rule instructs it to do so.

BATTLE END
The battle ends when the Ambull is taken Out of Action, or when the gang has no fighters remaining on the battlefield.

VICTORY & REWARDS

VICTORY	If the Ambull is taken Out of Action, the gang is victorious. Otherwise, the Ambull wins the encounter.
CREDITS	If victorious, add 2D6x10 credits to the gang stash if the Arbitrator allows this scenario in campaign play.
EXPERIENCE	Each participating fighter gains 1 XP. The fighter who takes the Ambull Out of Action gains D3 additional XP.
REPUTATION	If victorious, gain 1 Reputation. If the gang Bottles Out, lose 1 Reputation.

CAMPAIGN NOTE: The original scenario was written primarily for skirmish play. These rewards are retained for Arbitrators who choose to use the Hunt as a campaign encounter.

HUNTER & HUNTED

At the start of the battle the Ambull is not on the battlefield. While it remains in the shadows, the crew searches cautiously for signs of the creature. Once the Ambull appears, fighters act normally and treat it as an enemy model.

WHILE THE AMBULL IS HIDDEN

When a fighter activates while the Ambull is not on the battlefield, that fighter may perform no more than one Move (Single) action and one Hunt action, in either order. Hunt actions are Search Area and Give Cover, below. Fighters must still obey all restrictions imposed by their current status and the core rules.

SEARCH AREA (SINGLE)
Make an Intelligence check. Apply +1 if the Ambull has appeared previously and since returned to the shadows. Record whether the check succeeds or fails, then immediately make an It Came From the Shadows roll. Search successes and failures are cumulative for the current round only.

GIVE COVER (SINGLE)
Place a Giving Cover marker on the fighter. If the Ambull appears, that fighter may make the reaction shot described by the appearance result even if it has already activated. A reaction shot is not an activation and does not alter Ready status. Remove the marker after it is resolved or in the End phase.

IT CAME FROM THE SHADOWS!

After each Search Area action, roll D6. Apply -1 for each failed Search Area check made this round and +1 for each successful Search Area check made this round, including the current fighter. Treat a modified result of 1 or less as 1 and a result of 8 or more as 8+.

D6	Outcome	Effect
1	"Oops..."	Place the Ambull in base contact with the searching fighter. That fighter's activation immediately ends. The Ambull immediately activates and counts as having Charged for any rule that cares whether it charged this activation.
2-3	"It's Behind You!"	Place the Ambull within 3" of the searching fighter and, if possible, completely outside that fighter's vision arc. Resolve placement using the Threat Principle. Each fighter with a Giving Cover marker may immediately Shoot at the Ambull with -3 to hit. Remove those markers, then activate the Ambull.
4-7	"What's That?"	False alarm. Roll a Firepower die for each fighter with a Giving Cover marker. If a fighter has multiple ranged weapons, nominate one first. On an Ammo symbol, make an Ammo check as normal. Remove all Giving Cover markers after resolving these rolls.
8+	"There It Is!"	Place the Ambull within 6" of the searching fighter. Resolve placement using the Threat Principle. Each fighter with a Giving Cover marker may immediately Shoot at the Ambull with -2 to hit. Remove those markers, then activate the Ambull.

PLACEMENT PRINCIPLE: If terrain makes an instructed placement impossible, place the Ambull as close as possible to the instructed distance while following the same facing, cover and Threat Principle priorities.

THE ROGUE AMBULL

The creature stalking the dome is a true Ambull: a massive subterranean predator adapted for sudden violence, rapid burrowing and relentless close combat. The supplied Joint Ops Nemesis card identifies it as a Move 6", Save 4+, five-attack Brawler with Enormous Claws and 35 Wounds. Because Kill Team and Necromunda use different damage scales, those values are translated rather than copied literally.

AMBULL PROFILE

M	WS	BS	S	T	W	I	A	Ld	Cl	Wil	Int	Armour
6"	3+	-	6	6	6	4+	5	8+	4+	8+	9+	4+

WEAPON

Weapon	Range	Str	AP	D	Traits / Notes
Enormous Claws	Melee	6	-2	2	Melee, Rending. The Ambull re-rolls unmodified hit rolls of 1 made with this weapon.

SUPPLIED JOINT OPS REFERENCE

ALIEN ABOMINATION: The Ambull does not use a Ready marker and is never selected as part of normal alternating activations. While it is on the battlefield, immediately after each fighter activation - or after the final fighter in a Group Activation - resolve one Ambull activation using Feral Brawler Behaviour. This interrupt does not change Priority.

UNBREAKABLE: The Ambull never Bottles Out and cannot become Broken. Other statuses affect it normally unless a scenario rule says otherwise.

RAD-MAGGOT SYMBIOSIS: The first time the Ambull activates in each round, if it has lost one or more Wounds, it regains 1 lost Wound, up to its starting Wounds. This is a Necromunda-scale translation of the datacard rule; healing is limited to once per round because the Hunt gives the Ambull multiple triggered activations.

NEMESIS BULK: The datacard's 35-Wound durability, Extra Defence and Bulky identity are represented here by Toughness 6, 6 Wounds and a 4+ armour save rather than by importing Joint Ops core rules whose full text was not supplied.

TRANSLATION NOTE: The Ambull card's Brawler behaviour is preserved directly in the scenario AI: fight first, charge the closest enemy by the shortest route, then close distance while seeking cover. Its Control characteristic is not used because this scenario has no objective-control subgame.

ACTING ON INSTINCT

Whenever the Ambull activates, resolve the first applicable behaviour below. Each behaviour describes the Ambull's entire activation. If a listed action cannot legally be performed, move to the next applicable behaviour.

Priority	Trigger	Ambull Behaviour
1	Finish Prey	If the Ambull can perform a Coup de Grace (Single) action against a Seriously Injured fighter, it does so. If it still has an action available, it then performs a Move (Single) action toward the closest remaining fighter.
2	Fight	If Engaged, perform a Fight (Double) action. If more than one enemy is eligible, apply the target priorities under Threat Principle.
3	Charge	If the closest eligible fighter is within 8", perform a Charge (Double) action toward that fighter by the shortest legal route. If the Charge allows a Fight as a Free action, the Ambull must perform it.
4	Rush	If at least one fighter is visible but none are within 8", perform a Dash (Double) action toward the closest visible fighter. Use the shortest legal route; when equally short endpoints are available, prefer one that provides the Ambull with cover.
5	Back to the Shadows	If no fighter is visible, the Ambull immediately returns to the shadows as described below.

THREAT PRINCIPLE

Whenever the Ambull has multiple equally valid choices, resolve them in the order below. This adapts the Joint Ops principle that automated enemies choose the option that is worst for the players, while preserving the original Hunt rule that the creature prefers the closest fighter.

- TARGET: choose the closest eligible fighter. If two or more are equally close, choose a Wounded fighter first (a fighter that has lost one or more Wounds or has one or more Flesh Wounds), then a fighter with a Ready marker, then the option least favourable to the gang. If no meaningful difference remains, determine the target randomly.
- ROUTE: use the shortest legal route. If multiple routes are equally short, prefer the route or endpoint that grants the Ambull the greatest cover without preventing the required action. Break any remaining tie against the gang, then randomly if necessary.
- APPEARANCE: when a Shadows result allows several legal placements, choose the placement that best protects the Ambull while preserving the shortest route to the searching fighter. Break remaining ties against the gang.

BACK TO THE SHADOWS

When the Ambull returns to the shadows, remove it from the battlefield. It retains its current Wounds and any lasting injuries or effects that would logically persist. It cannot reappear again during the same round, but may be discovered in a later round through Search Area actions.

DRAG AWAY PREY

During the End phase, if the Ambull is in base contact with a Seriously Injured fighter and no other gang fighter is within 4", the Ambull drags that fighter into the darkness. Remove both models. The fighter counts as Out of Action; the Ambull has returned to the shadows and cannot reappear this round.

BURROWING ESCAPE

Once per round, after an attack against the Ambull has been fully resolved and caused it to lose at least 1 Wound, if the Ambull is not Engaged, make an Initiative check for it. If passed, it returns to the shadows. Damage is never reduced or ignored by this rule.

WHY 8 INCHES?: The original M4" Rogue Ambot charged when the nearest fighter was within 6" - effectively Movement + 2". The Ambull datacard increases Move to 6", so an 8" trigger preserves that threat relationship without allowing the creature to attempt every mathematically possible long Charge.

TABLE-SIDE QUICK REFERENCE

ROUND FLOW

State	What to Do
Ambull hidden	Player activates fighters in any legal order. Each fighter may make up to one Move plus one Hunt action. Search Area can cause the Ambull to appear.
Ambull appears	Resolve any Giving Cover reaction shots from the appearance result, then immediately resolve one Ambull activation.
Ambull present	After every fighter activation - or the final fighter in a Group Activation - immediately resolve one Ambull activation using Feral Brawler Behaviour.
End phase	Remove remaining Giving Cover markers. Check Drag Away Prey. Resolve normal Bottle/victory checks. If the Ambull returned to the shadows this round, it cannot reappear until the next round.

FERAL BRAWLER - ONE-LINE PRIORITY

#	Check	Resolve
1	Coup de Grace available?	Finish prey; then Move toward the closest remaining fighter if an action remains.
2	Engaged?	Fight.
3	Closest fighter within 8"?	Charge by shortest route; Fight Free if allowed.
4	Any fighter visible?	Dash toward the closest visible fighter; prefer cover among equally short endpoints.
5	None visible?	Back to the Shadows.

SEARCH ROLL

Modified D6	Result
1	Ambull appears in base contact; searching activation ends; Ambull activates.
2-3	Ambull appears within 3" and outside vision if possible; Cover shots -3; Ambull activates.
4-7	False alarm; Firepower dice for Giving Cover fighters; Ammo checks as required.
8+	Ambull appears within 6"; Cover shots -2; Ambull activates.

DIFFICULTY DIAL

Joint Ops explicitly treats NPO Wounds as a difficulty lever. For this single-Nemesis conversion, adjust only the Ambull's starting Wounds unless your group wants a more extensive rebalance:

Difficulty	Starting Wounds	Notes
Lighter Hunt	W 5	Keep Rad-Maggot Symbiosis.
Standard	W 6	Use the profile and rules as written.
Hard Hunt	W 7	Use the profile and rules as written.
Relentless Nemesis	W 8	Recommended only for experienced or unusually well-equipped crews.

SOURCE ALIGNMENT: Scenario structure adapted from The Hunt (Games Workshop, 2020). Autonomous-enemy logic is influenced by the Kill Team Joint Ops Mission Pack's Brawler Behaviour and Threat Principle. Ambull identity is based on the user-supplied Nemesis NPO datacard. This is an unofficial fan adaptation for personal, non-commercial use.
